

Postdoc position in automorphic forms

Applications are invited for a postdoctoral fellowship in the working group of Prof. Kathrin Bringmann at the University of Cologne. This position is partially funded by the ERC grant investigating automorphic q -series in Lie theory, combinatorics, and physics (in particular string theory). This position has a negotiable length of 1-5 years.

The successful candidate will have a Ph.D. in mathematics, with overlapping interests in automorphic forms or applications to number theory, Lie theory, combinatorics, or string theory. Each should have also a good research and publication record, judged by the state of his or her career.

Applicants should submit a curriculum vitae including a list of publications, detailed research statement, and the names and contact details of at least two referees, to be sent to Kathrin Bringmann (kbringma@math.uni-koeln.de).

The starting date for this position is negotiable.

Further inquiries may be made to Kathrin Bringmann at kbringma@math.uni-koeln.de.

Salary will be determined by experience level under the TV-L 12 or TV-L13 salary scale.
