Postdoc position in Durham University

We have a 1 year postdoc position available at Durham University, funded by my EPSRC grant entitled 'Representation growth of linear groups over local rings'.

The position is available from 1 Oct 2013, or up to six months thereafter. Candidates with research interests in representation theory are encouraged to apply, and preference may be given to candidates with a background in at least one of the following areas: representation theory of finite or p-adic groups, zeta functions of groups, Deligne-Lusztig theory, algebraic groups.

The closing date for the application is 19 May and the online advert can be found at
