

ICRA 2016 Conference talks on Wednesday 17 August
Plenary talks in Auditorium 001

9:00 - 9:50	Catharina Stroppel: <i>Schur-Weyl dualities in non-semisimple cases</i>						
9:50 - 10:20	Coffee break						
10:20 - 11:10	Eleonore Faber: <i>Noncommutative resolutions of discriminants</i>						
	Aud. 001	Room 011	Room 100	Room 105	Room 126	Room 156	Room 200
11:20 - 11:40	Yuriy Drozd: <i>Non-commutative nodal curves and related algebras</i>	Charles Paquette: <i>Idempotent subalgebras and homological dimensions</i>	Miodrag Iovanov: <i>A novel combinatorial construction of representations and open questions of Auslander, Reiten, and Smalø</i>	Christof Geiss: <i>Quivers with relations for symmetrizable Cartan matrices - change of symmetrizer</i>	Joshua Stangl: <i>Orders and non-commutative crepant resolutions</i>	Véronique Bazier-Matte: <i>Unistructurality of cluster algebras of type A-tilde</i>	Yuehui Zhang: <i>Endomorphism category of an abelian category</i>
11:50 - 12:10	Justyna Kosakowska: <i>Cyclic embeddings - geometry and combinatorics</i>	Yang Han: <i>A construction of dualizing categories by tensor products of categories</i>	José Velez-Marulanda: <i>Singular equivalences of Morita type and universal deformation rings for Gorenstein algebras</i>	Pu Zhang: <i>Monic representations</i>	Maiko Ono: <i>On the general principle behind Auslander-Reiten duality</i>	Wen Chang: <i>Cluster automorphism groups of cluster algebras</i>	Mee Seong Im: <i>An approach to categorification of infinite dimensional modules for \mathfrak{sl}_2</i>
14:00 -	<i>Excursion</i>
